

EXHORTATION—5/3/11

Sister Wynette, I encourage you and others to go on and to express as God gives you to do in the Holy Ghost. If we are going to become an effective, breathing organism then we must point out when things are ineffective. If no souls are coming into the kingdom, cast your net onto the other side. Go on and say it, put your presentation together. It may be the thing that changes the way that we live. Thomas Edison had over 1,000 patented inventions. He had a spirit of I can't quit. I can't stop. I am speaking to businessmen, pastors, business people with entrepreneurial ideas, a nurse or medical field. You want to establish a networking, reference pool. I am trying to broaden this enough for more people to fit in here. This is supposed to be a lucrative thing. They make up a group and people will come to them and they will be resourced out. Min. Tommy does this. God is trying to set you up.
